

**What are these animals' favorite foods? Match the animal to its favorite food – there may be some animals that eat more than one!**

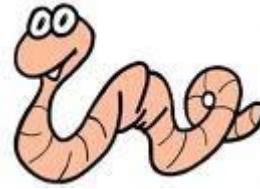

What are their shelters? Match the animal to its shelter

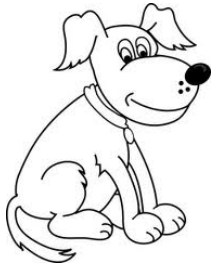

Bee

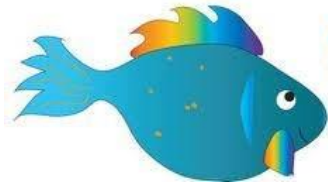

Squirrel

Worm

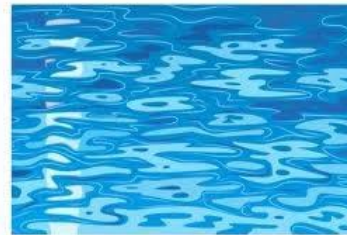

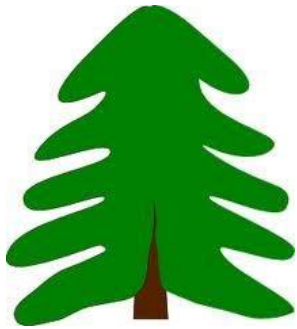

Dog

Fish

Sheep

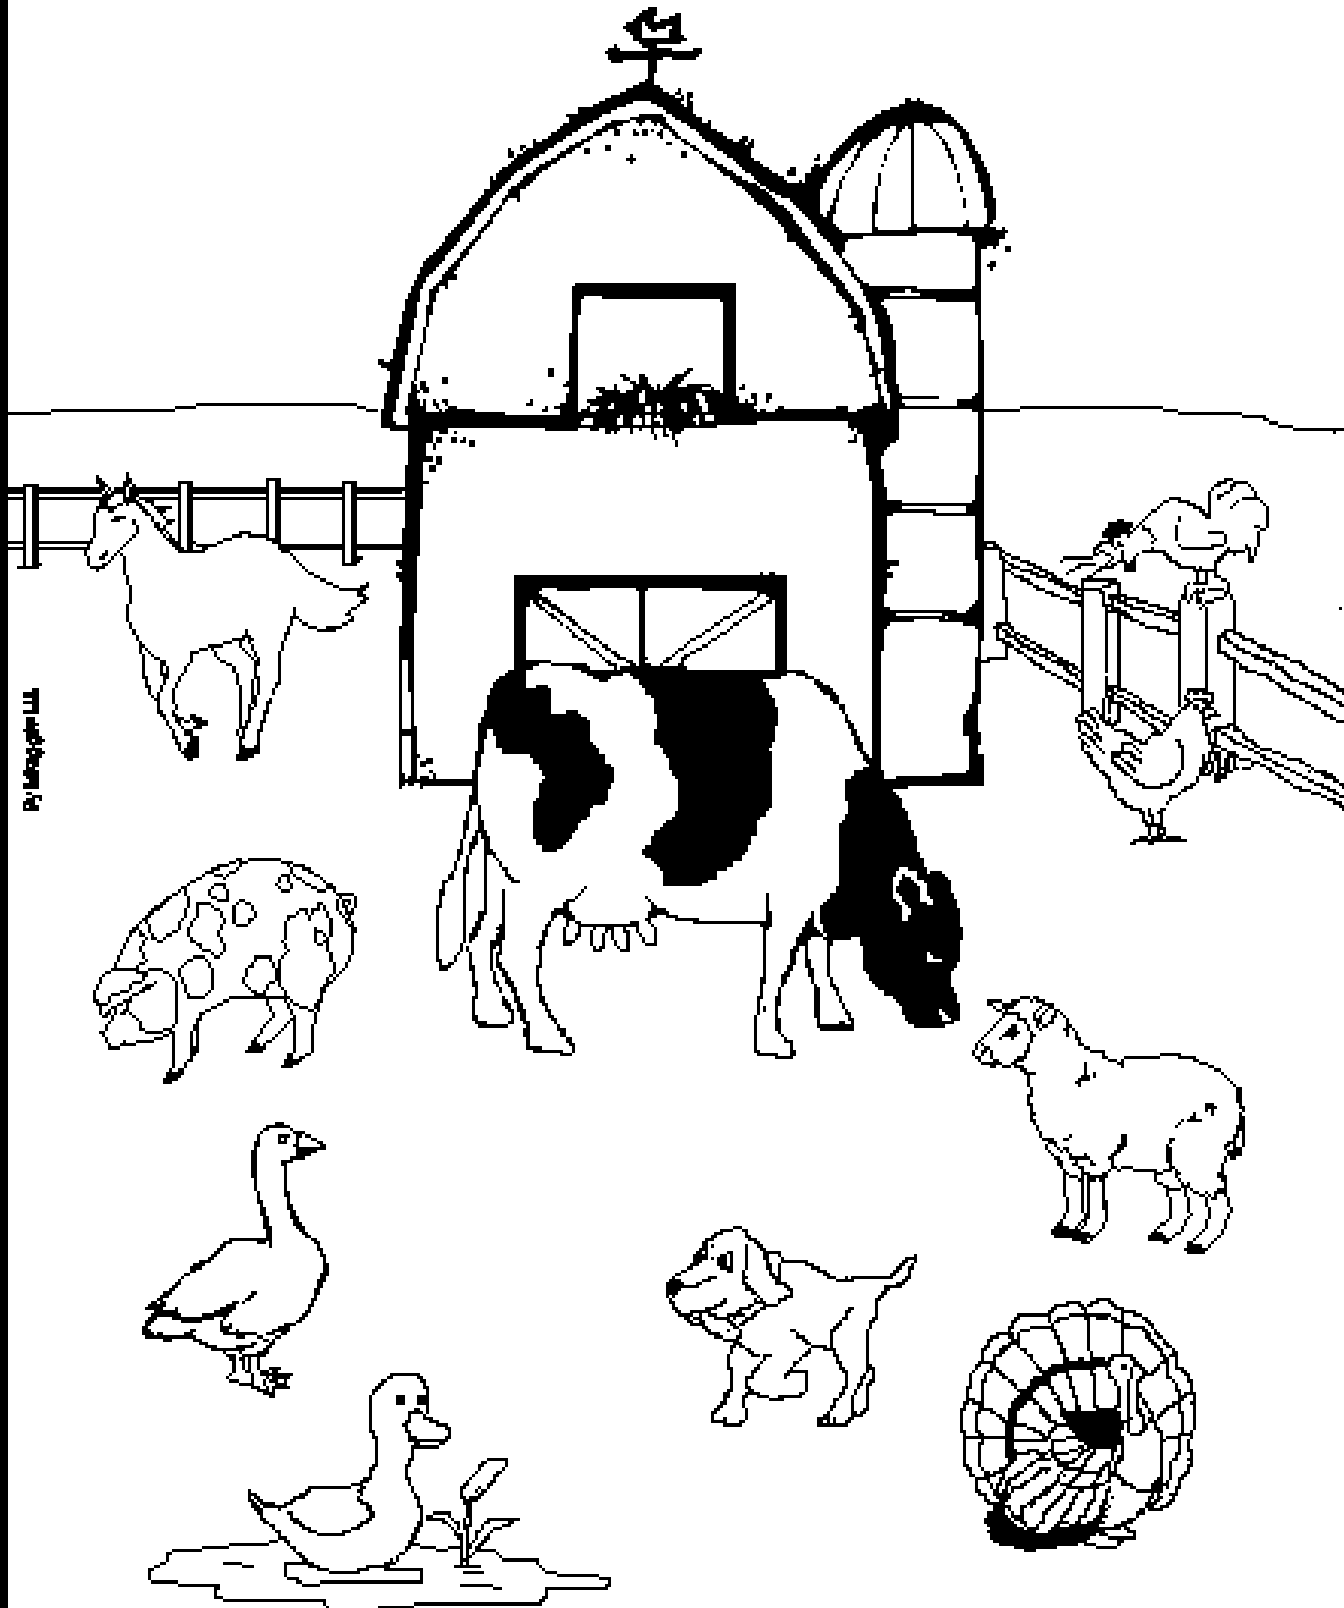

Do you know why insects are important? They feed other animals, and they feed on each other to keep birds, frogs, ladybugs, etc. alive and well!

Do you know why mice are important? They feed other animals like eagles! God has a plan for everything, we need to take care of all creation, even the ones we may think aren't important, because they are important to God!
