

**Abram's Tent – use brown construction paper and fold in half. Cut out template and place folded construction paper on the place below marked (place on fold, do not cut).**

**Next, cut out the rest of the template onto the construction paper. Fold the two spots where indicated and then remove template from construction paper. Glue on the construction paper the spots marked on the template below and glue and fold together to attach the two glued pieces. Let children use dolls or play dough to make people to go in and out of the tent – Just like Abram did!**
