

Print templates in color on white cardstock paper. Cut out fish and coins (laminates if wanting to use this game again if able). Have a fish for each team (there should be two teams in a class – try and split them evenly.) Each team tries to answer one of the questions you provide. If they get it right they get to pick a coin and put it with their fish – the group with the most coins wins – but hopefully everyone can answer the questions and everyone wins. This will remind them of the story of the coin and the fish!
