

Heart Collage Frame Template

Cut out the outside of the square and inside the square to create a photo frame shape. Next, using pink or similar foam color cut out the other template on the next page and cut the outside and inside square of that to create a frame within a frame. See Lesson 11 for picture.

Next cut out the heart shape below out of foam either pink or purple as an accent for the corner of the frames. Then cut out the strips out of any color scraps.

Inner Frame
Cut one out of
pink craft foam

The diagram shows three rectangular strips. Two vertical strips are positioned on the left and right sides, and one horizontal strip is positioned at the bottom. The word 'Side' is written vertically inside each of the two vertical strips. The word 'Bottom' is written horizontally inside the bottom strip. In the center of the page, there is text that reads 'Frame Strips' followed by 'Cut each one out of 1/4 inch thick craft foam'.

Finally, for the actual picture, using purple or similar colored construction Paper, use the outside of one of the frames and follow the square shape – only cutting the outside of the square so that the construction paper will be able to be glued to the back of the frame. In the middle of the construction paper will be where you will make a handprint and that will be the centre of your photo frame.
